Skills

Languages: HTML/CSS, Python, SQL **Technologies & Tools:** GIT, Power Bi, Tableau, MS Word, MS Excel , GitHub

SUMMARY

A detail-oriented and analytical individual with a strong foundation in data analysis, data cleaning, and data visualization. Proficient in using tools such as Excel, Python, and SQL for data manipulation, statistical analysis, and reporting. Familiar with data visualization platforms like Power BI or Tableau to create insightful dashboards and reports. Adept at interpreting complex data to help drive business decisions and improve operational efficiency. Eager to apply strong problem-solving and quantitative skills in a dynamic, data-driven environment.

PROJECTS

FACE RECOGNITION:

- I developed a facial recognition system that detects and identifies individuals in real-time using machine learning algorithms, specifically Haar Cascade for face detection and LBPH for facial recognition
- I utilized Python with OpenCV and Dlib libraries to implement face detection and recognition, training the model with a dataset of labeled images, and created an intuitive interface for real-time application

IMPACT:

my facial recognition project can drive enhanced security and access control, streamline personalized experiences in retail and healthcare, and accelerate criminal identification in law enforcement. Additionally, it has the potential to improve user authentication systems, boost automation in attendance tracking, and provide better accessibility for the visually impaired

ZOMATO SALES ANALYSIS:

- I analyzed Zomato sales data to uncover key insights into sales trends, regional performance, and customer behavior. My analysis focused on identifying the factors affecting sales, such as customer ratings, restaurant types, and locations
- I also visualized the data through charts and graphs to present these findings in a clear and engaging way, helping to highlight important trends and patterns within the dataset..

SALES PERFORMANCE ANALYSIS:

- I analyzed sales performance using Excel and Power BI, cleaning and organizing data to identify trends in revenue, customer behavior, and product performance. I built interactive dashboards to visualize key metrics, enabling data-driven decision-making.
- Using Excel, I applied pivot tables, VLOOKUP, and formulas for data analysis. In Power BI, I created dynamic reports with DAX and custom visuals to highlight trends and insights, helping stakeholders optimize sales strategies."

Education

OCT 2021 - APRIL 2024

MADARAS UNIVERSITY: Bachelor of computer application GPA: 7/10

DRBCCC HIGHER SECONDAY SCHOOL: HSC in computer science. Score:450/600

JUL 2019 - APRIL 2021

Awards and Certificates

JUL 2024 - JAN 2025

Data analyst course: I have completed data analyst course in greens technology anna nagar

AI & image procesing: I have done this course in my college days. through my college

SEPTEMBER-2023

Interests

- Reading books
- Traveling
- self improvement
- Fitness
